

## **Murphy Moose**

### ***Factory-built Moose - 1996***

This well equipped **Murphy Moose** was built by the factory as a demonstrator **Super Rebel**. After a few of years flying, it was returned to the factory for rebuild into a **Moose**, with stronger wings and higher gross weight. Gross weight is 3500 pounds. 250hp Lycoming O-540 with about 1,100 hours since factory new.

The workmanship on this aircraft is better than you'll find on any certified plane and the paint job is great. This is a huge airplane with 4 to 6 seats, and room for LOTS of luggage, with a separate cargo door ! Hangared in Eastern USA.

### **Equipment:**

Dynon panel, 4 Fully Adjustable Individual Seats, Electric Elevator Trim, Front/Rear seat heat, Heated Pitot, Strobes/Nav Lights, Internally Lighted Instrument Panel, Landing and Taxi Lights, Ailerons reflex down with full flap deployment effectively providing full span flaps.

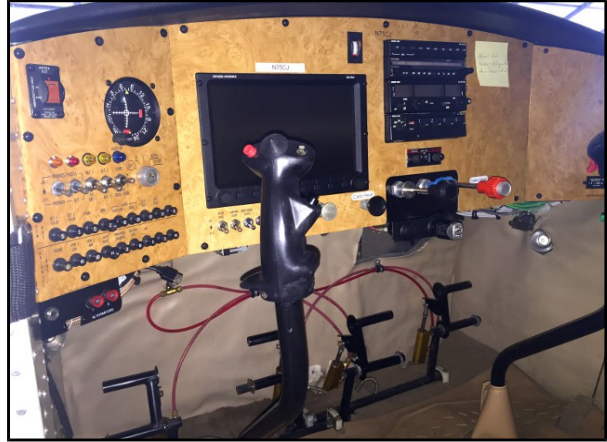

### **Avionics:**

EGT & CHT/Amps/Volts/Oil P/Oil, fuel totalizer, Transponder w/encoder, Audio Panel.

**Asking only \$ 119,000 USD, negotiable.**
